## **Deshotels 20-H No.1 Drilling Update Turner Bayou Chalk Project**

The Deshotels 20-H No.1 well in the Turner Bayou Chalk project is currently at a depth of 4,495 feet (1,370 metres). Surface casing has been set to 4,500 feet (1,371 metres) and cemented. Drilling will resume after the cement has cured.

Pryme has a 40% working interest (30% net revenue interest (NRI)) in this well.

### **Project Description**

The Deshotels 20-H No.1 well in the North Bayou Jack Field is the first deep well to be drilled within the Turner Bayou 3D seismic survey. The well will be drilled to a depth of 15,380 feet (4,688 metres) vertically with a 4,500 foot (1,372 metre) horizontal lateral through the Austin Chalk formation which is predominantly oil bearing in this region.

Turner Bayou is one of Pryme's high value projects. It is located in Avoyelles Parish, Louisiana. Pryme has a 40% interest in the Turner Bayou Chalk project area, which is contained within the Turner Bayou 3D seismic survey, and a 52% interest in the balance of Turner Bayou. The Turner Bayou project comprises approximately 80 square miles (50,000 acres) which have been imaged by a proprietary 3D seismic survey. Primary targets are contained within six prospective formations ranging in depth from the Frio formation at 3,000 feet, to the Tuscaloosa formation at 18,000 feet.
